

Collage

This is a very open ended project, the only requirement is that it is a form of **collage**- a piece mixing different images & layers to create a unified composition.

Can be completed in Photoshop or Illustrator, or a combination of both.

project description

- You may want to include some hand drawn elements - hand drawn & scanned, drawn with the pen tool, drawn in photoshop
- The idea is to make it look layered, make it look like different materials, mixed media
- You can scan images & materials - fabric, lace, newspaper clippings, sheet music etc.
- You should use your own photography or drawings
- Use [Blending Modes](#) & Layer Adjustments (Which you should have just learned about)

Use my pinterest to find [graphics](#), [textures](#) & [fonts](#)

Having trouble thinking of ideas?

- illustrate a song lyric / quote / poem
- keep it simple- choose an [object](#) and create it with pieces of other images
- take a stance on a social issue
- find inspiration from [Surrealism](#) & artists like Salvador Dali - alternate reality
 - create a portrait [juxtaposing](#) two images
 - create a self portrait using images and photographs
 - use imagery from a [book](#) or movie
