Type of portrait: Watercolor Portrait
Tutorial: http://10steps.sg/tutorials/photoshop/creating-an-abstract-watercolor-wallpaper/
Tool/ Technique Used: Layer Mask

Here, the layer mask is going to allow the watercolor layer to only come through in the shape of Jim Morrison's face

Click here to add a layer mask to the watercolor layer
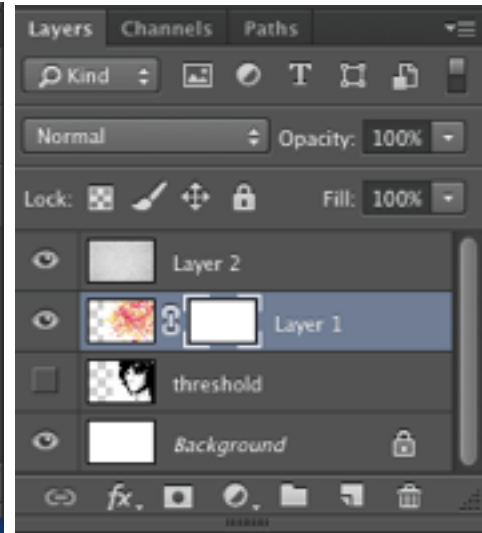

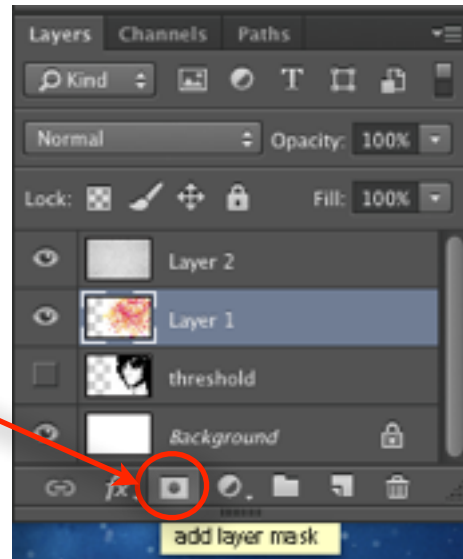

1. Copy the image of Jim Morrison
2. ALT click on the white Layer Mask (everything will go white)
3. Hit Command + V to paste his face
4. Hit Command + I to invert it
It should now look like it does to the left
5. Hit Command + D to deselect

Layer Masks allow you to PAINT IN the image or Paint it out (like the quick mask!)
This way if you erase some, you do not loose it (called Non-Destructive)
Use a brush, use black and white to paint more of the watercolor effect in or out.
x swaps between a black and white brush
