

Photoshop Portrait Project

For this project you will look for an interesting portrait that catches your eye and learn how to complete it in Photoshop. You will find a tutorial about how to achieve the look and will learn from following a written or youtube tutorial.

You will complete one with an internet image first, then will recreate the technique using a photo of **yourself**.

How do I start?

1. Go to [pinterest](https://www.pinterest.com) & look through the different types of portraits
 2. Google Portrait tutorial ideas :

- 3.. Choose a type of portrait you want to create
4. If it is a tutorial already, great get started.
5. If you need help, I can offer suggestions of how to re-create it.

You should do a tutorial version with an [internet image](#) / celebrity first

Then use the same techniques to create a SELF portrait (bring in a photo or use photobooth)
